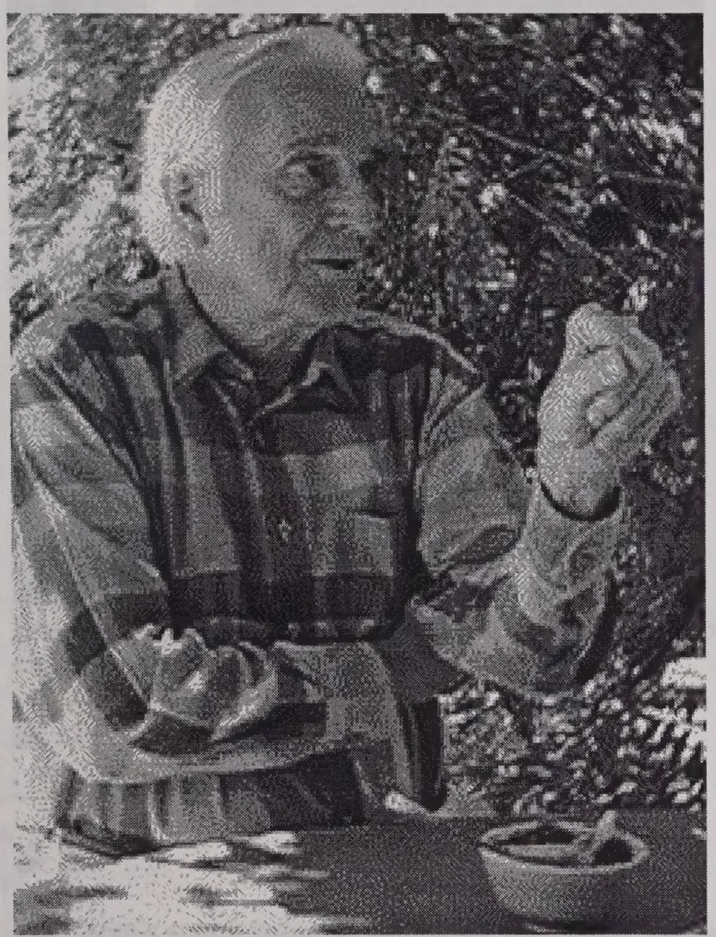
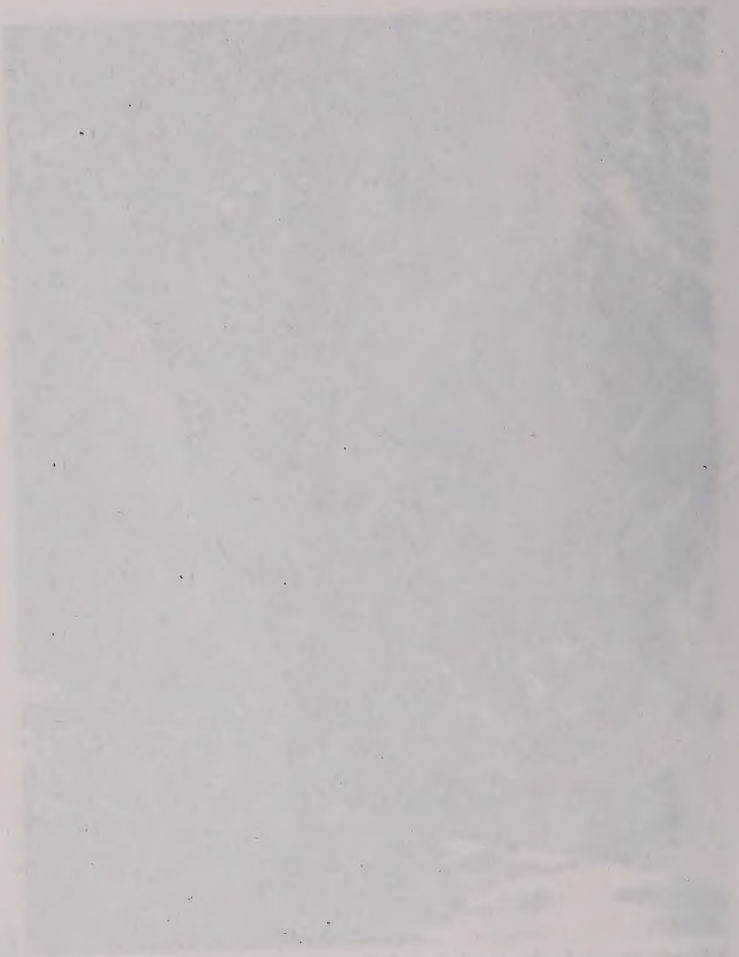
THE INSPIRATION OF DOUG

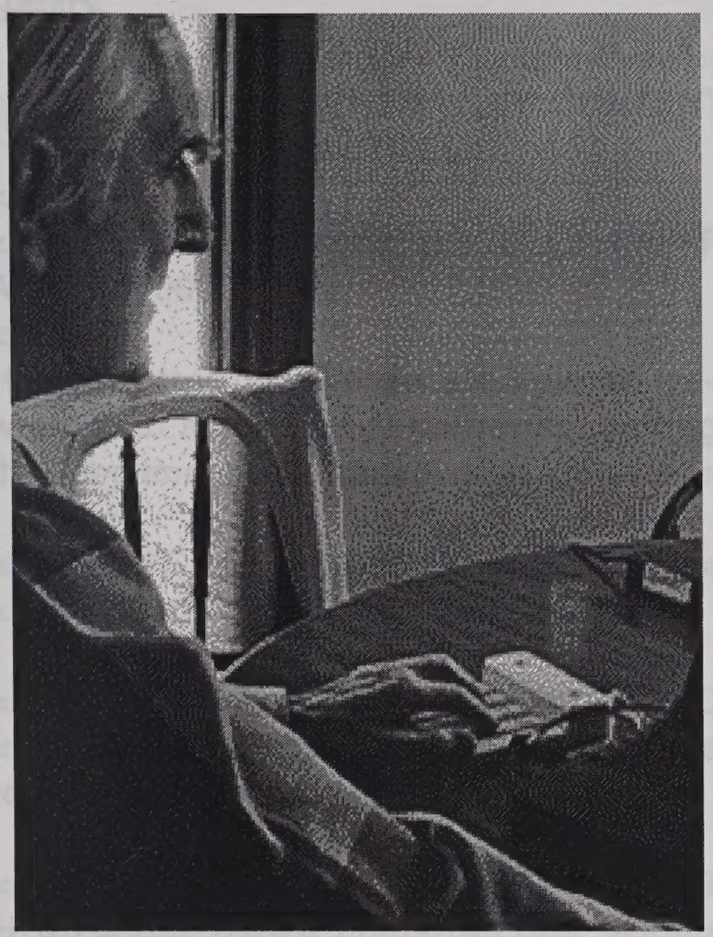
Douglas Engelbart is so many things to so many people that it's hard to say anything about him.



Douglas Engelbart Ted Nelson

Many people have heard that he invented the computer mouse, but those who know him know the rest of his work is much greater. He invented word processing, outline processing, multiple windows on a computer screen, and even a five-finger keyboard for the hand that's not holding the mouse. 55





But his real vision is much greater than that: a lifelong vision of a world of human collaboration and empowerment.

Fix NAME

But there's much more to him even than that. Those who know Doug Engelbart as a colleague, friend or teacher know even more. We know his warmth and we know his determination and we too are inspired to warmth and determination in his honor.
